

Student Management System Using Flask and MySQL

The Student Management System is a web-based application developed using Flask and MySQL to efficiently manage student records. It allows the administrator to add, update, delete, search, and view student information through a simple and user-friendly interface.

```
MySQL Shell 8.0.46

Module 1: Login

- Secure admin login
- Username and password authentication

Module 2: Dashboard

- Displays total students
- Quick navigation

Module 3: Add Student

- Add new student details
- Store data in MySQL database

Module 4: View Students

- Display all student records
- Search student details

Module 5: Update Student

- Modify existing student information

Module 6: Delete Student

- Remove unwanted student records
